

Christine S.

Job: Conflict Analyst

Description: Christine S. is a seasoned Conflict Analyst with a background in Political Science and International Law, working for the Analysis and Early Warning Unit of the World Food Programme.

Her expertise is in predictive analysis for Eastern Africa, where she identifies potential threats to food security.

In her role, Christine faces challenges like accessing reliable data and interpreting the complex factors that influence food security in conflict zones.

She spends much of her time sorting through varied Excel files from different sources, painstakingly extracting crucial data on internally displaced persons (IDPs) to inform her analysis. Despite these difficulties, Christine's contributions are crucial in the WFP's efforts to preemptively address food crises and aid those in the most need. Her analytical work, though challenging, is a cornerstone in the fight against hunger in volatile regions.

Background: Political Science, International Law, Analyst for various international organizations

Relation to topic: conducts predictive analysis to investigate emerging risks for food security, works with the Early Warning Preparedness Unit; Focus in Eastern Africa

Group: Analysis and Early Warning Unit

Pains:

- difficult to collect data to conduct predictive analysis
- hard to estimate how certain factors affect the food security in certain regions
- has download various excel file from different data sources
- manually scan excel files with different format for information about idps
